Skybrud.Social Free Download is a lightweight .NET Framework integration for social services and micro-services. Please note, that in the [Releases](page is listed 4.0. In Azure Portal it runs without any issues with 4.0. Skybrud.Social is intended to be easy to integrate and can be used out of the box. Developers need to write the code for fetching the data and setting up the API communication, we do the rest for you, we handle the data or service communication, retrieve the RSS feed and analyze it, do the data sorting, preparing the results, the views, the customizations and all the rest. You only need to know your target service and its API.

You do not need to know, how the RSS stream works, how to fetch the RSS feeds or any other technical details, we do it for you. Skybrud.Social is also able to communicate with services that do not require API authentication. For such a case it is possible to store the data locally and only to pass it on to the service after a successful authentication. The communication is based on the [RestSharp](library and can therefore be exchanged between .NET Framework, Mono, .NET Core, .NET with Xamarin, Python and Ruby
Skybrud.Social is able to work with almost all free and paid social networks in the world. Skybrud.Social supports plain RSS, JSON, Laconic, JSON API and other so called supported formats. You will have to

provide the content of the RSS feed (RSS entries) and its structure (headings, namespaces, tags etc). There are several parameters and tags that can be used in order to provide the needed format (RSS, JSON or Laconic) of the feed. We do everything except generating the actual RSS feed. The login, authentication, fetching the content and making the final requests, working with the API, web calls, filters, contexts, sorting and displaying the results. All this is done by us. Skybrud.Social is intended to work with a .NET Core API. To be able to do so, it was necessary to implement a new API. This API is based on OData and is fully supported by 09e8f5149f

As the market for electric vehicles has increased, the market for electric vehicle (EV) charging systems has evolved accordingly. A conventional EV charging system can transfer power to an electric vehicle from an external charging facility at a low voltage (e.g., a relatively high current). In contrast to the external charging facility, a smart charging facility can transfer power to an electric vehicle at a high voltage (e.g., a relatively low current). As such, the smart charging facility can reduce the overall costs associated with charging the electric vehicle by transferring power at a relatively high voltage and a relatively low current. The conventional EV charging systems, however, are expensive. Thus, a desire exists to reduce the costs associated with an EV charging system. Q: can't calculate non standard integral. I am trying to calculate this non-standard integral $\int_0^{\infty} \frac{1}{e^x} \sin(\frac{x}{2}) dx$ using the following approximation $\sin(\frac{x}{2}) \approx \frac{x}{2}$ But I am still having trouble with it
