I'm pretty sure I'm right, because the last time I used this was the end of last year. Back then, it used to be able to recover a corrupt DB by restoring the tables from the backup, but it only works with single-user databases. My version (5.2) doesn't have that option, and I don't know if the older version does either. Originally Posted by Ominous Gamer Please refrain from using all-caps in your argument titles.
